

Dear Hiring Manager,

I am writing to express my strong interest in the Equity Derivatives Business Analyst (Structured Products) role at Citigroup.

My five years of experience in financial operations have equipped me with a deep understanding of derivatives trading workflows and the operational rigor required in complex product environments. At Morgan Stanley, I spent 2.5 years in Prime Brokerage, where I managed trade settlement, reconciliation, and counterparty payments for sophisticated financial instruments. This exposure to derivatives mechanics, combined with my expertise in FX reporting and month-end close procedures, has given me practical insight into the operational challenges of structured products.

My MSc in Investment and Risk Finance (Distinction) strengthened my theoretical foundation in derivatives pricing, risk management, and structured product design, enabling me to bridge business operations with quantitative analysis. Additionally, my earlier role at Mphasis honed my process optimization and data validation capabilities, skills directly applicable to enhancing operational efficiency in a fast-paced trading environment.

I bring proficiency in Excel/VBA, Bloomberg, and advanced data analysis, alongside strong problem-solving abilities and proven stakeholder management experience. I am particularly drawn to Citigroup's commitment to innovation in structured products and believe my analytical mindset and operational acumen would enable me to contribute meaningfully to your team.

I am eager to leverage my derivatives operations background to support front-office teams and drive analytical excellence in equity structured products.

Thank you for considering my application. I look forward to discussing how I can add value to your business.

Yours sincerely,
Nidhi Shetty
