

Dear Hiring Manager,

I am writing to express my strong interest in the Finance Desk Technology - Collateral Management Development Lead position at Citigroup.

My background in prime brokerage operations at Morgan Stanley has equipped me with deep technical knowledge of collateral workflows, settlement processes, and counterparty risk management. Over 2.5 years, I managed trade settlement, reconciliation, and month-end close procedures while working closely with technology teams to optimize operational efficiency. This hands-on experience in high-volume, regulated environments has given me a thorough understanding of the systems and challenges that collateral management teams face daily.

My transition into technology-focused roles began at Mphasis, where I specialized in process optimization and data validation. I identified inefficiencies in operational workflows and collaborated with stakeholders across multiple teams to implement solutions. These experiences developed my ability to bridge business and technology perspectives, a skill essential for a development lead role.

My technical proficiency in Excel, VBA, and Bloomberg, combined with my MSc in Investment and Risk Finance (Distinction), provides the analytical foundation needed to lead collateral management technology initiatives. I am particularly drawn to Citigroup's commitment to sophisticated risk infrastructure and am confident I can drive meaningful improvements to your collateral platforms.

I am excited about the opportunity to leverage my operational expertise and technical acumen to lead your collateral management development team. I would welcome the opportunity to discuss how my background aligns with your requirements.

Yours sincerely,

Nidhi Shetty
