

Dear Hiring Team,

I am writing to express my strong interest in the Trading Desk Operations Engineer position at Jane Street. With 2.5 years of specialized experience in trade settlement and operations at Morgan Stanley, combined with a proven track record in process optimization, I am confident I can contribute meaningfully to your trading operations.

In my current role within Prime Brokerage, I manage critical trade lifecycle functions including settlement, reconciliation, and counterparty payments. This experience has deepened my understanding of operational risk, reconciliation frameworks, and the precision required in fast-paced trading environments. I have developed strong technical proficiency in Excel and VBA, enabling me to automate manual processes and enhance data accuracy. My work with Bloomberg and FX reporting has further strengthened my ability to navigate complex financial data and systems.

Prior to Morgan Stanley, my two years as an Operations Analyst at Mphasis focused on process improvement and data validation across large-scale operations. I have consistently identified inefficiencies, implemented solutions that reduced manual work, and collaborated effectively with cross-functional stakeholders. My MSc in Investment and Risk Finance (Distinction) has provided me with rigorous analytical foundations and deep financial markets knowledge.

I am particularly drawn to Jane Street's reputation for operational excellence and intellectual rigor. Your emphasis on building efficient, resilient systems aligns perfectly with my career trajectory and passion for trading operations. I am eager to bring my reconciliation expertise, technical skills, and problem-solving mindset to your team.

Thank you for considering my application. I welcome the opportunity to discuss how my experience can support Jane Street's operations.

Best regards,

Nidhi Shetty
