

Dear Hiring Manager,

I am writing to express my strong interest in the Senior Credit Analyst position at Monzo Bank. With five years of experience in financial operations and risk management, combined with specialized knowledge in credit and investment finance, I am confident in my ability to contribute meaningfully to your credit team.

In my current role at Morgan Stanley's Prime Brokerage division, I have developed a deep understanding of counterparty risk management, trade settlement, and financial reconciliation. My responsibilities encompassing counterparty payments, FX reporting, and month-end close processes have equipped me with the analytical rigor and attention to detail essential for credit analysis. Additionally, my MSc in Investment and Risk Finance (Distinction) has provided me with comprehensive knowledge of credit modeling, risk assessment frameworks, and regulatory requirements.

My background at Mphasis further strengthened my capability to drive process optimization and data integrity. I excel at analyzing complex datasets using Excel and VBA, identifying patterns that inform strategic decisions. These skills directly translate to credit risk assessment and portfolio analysis.

What attracts me to Monzo is the opportunity to apply my technical expertise within a dynamic fintech environment. Your commitment to data-driven decision-making aligns perfectly with my analytical approach and passion for leveraging technology to enhance financial services.

I am eager to bring my rigorous analytical mindset, technical proficiency, and operational excellence to your credit team. I would welcome the opportunity to discuss how my experience supports your objectives.

Thank you for considering my application.

Yours sincerely,

Nidhi Shetty
