

Dear Hiring Manager,

I am writing to express my strong interest in the Treasury Risk Manager position at Monzo Bank. With my academic foundation in risk finance and practical experience managing complex treasury operations, I am confident I can deliver immediate value to your team.

My two and a half years at Morgan Stanley in Prime Brokerage have equipped me with deep expertise in the areas critical to this role. I have managed trade settlement, reconciliation, and counterparty payments while maintaining rigorous compliance with regulatory reporting requirements. My proficiency in FX reporting and month-end close procedures has sharpened my ability to identify operational risks and ensure accuracy across high-volume transactions. This experience has honed my analytical mindset and attention to detail in time-sensitive environments.

Prior to Morgan Stanley, I spent two and a half years at Mphasis as an Operations Analyst, where I focused on process optimization and data validation. This role developed my capability to streamline workflows and manage stakeholder relationships across functions, skills that directly translate to coordinating treasury risk initiatives.

My MSc in Investment and Risk Finance (Distinction) from the University of Westminster has provided me with rigorous technical knowledge in risk quantification, portfolio analysis, and regulatory frameworks. Combined with my BSc in Accounting and Finance, this ensures I understand both the strategic and operational dimensions of treasury management.

My technical toolkit includes advanced Excel and VBA capabilities, Bloomberg proficiency, and strong data analysis skills, all essential for the role.

I would welcome the opportunity to discuss how my experience can contribute to Monzo's treasury function.

Yours sincerely,
Nidhi Shetty
