

Dear Hiring Manager,

I am writing to express my strong interest in the Technology Lead, Treasury Management position at PIMCO Europe. With five years of progressive experience in financial operations and treasury functions, combined with technical expertise, I am confident I can drive innovation and operational excellence in your treasury technology environment.

In my current role at Morgan Stanley's Prime Brokerage division, I have managed critical treasury operations including trade settlement, reconciliation, counterparty payments, and FX reporting. This experience has provided me with deep insights into the complexities of treasury workflows and the importance of robust technological infrastructure. I have led month-end close processes involving multiple stakeholders and complex reconciliation requirements, demonstrating my ability to manage high-pressure environments whilst maintaining accuracy and compliance.

Prior to Morgan Stanley, I spent 2.5 years at Mphasis as an Operations Analyst, where I identified and implemented process optimization initiatives and led cross-functional teams to enhance operational efficiency. This background in process improvement positions me well to evaluate and enhance PIMCO's treasury technology systems.

My technical proficiency includes advanced Excel and VBA programming, Bloomberg terminal operations, and data analysis tools. These capabilities, combined with my MSc in Investment and Risk Finance (Distinction) from the University of Westminster, equip me to understand both the business requirements and technical solutions necessary for treasury management systems.

I am excited about the opportunity to leverage my operational expertise and technical skills to lead treasury technology initiatives at PIMCO Europe. I would welcome the chance to discuss how my background aligns with your requirements.

Yours sincerely,

Nidhi Shetty
