I am writing to express my strong interest in the Associate Product Controllers position within Goldman Sachs' Treasury Funding Controllers team. With 2.5 years of experience at Morgan Stanley's Prime Brokerage division and a Master's degree in Investment & Risk Finance (Distinction), I am eager to bring my financial services expertise back to an environment where I can apply and develop my technical accounting skills.

At Morgan Stanley, I developed a thorough understanding of financial instruments, trade lifecycles, and entity-level reporting through my work in trade settlement, reconciliation, and corporate actions processing. I routinely monitored and reconciled positions across multiple accounts, ensuring accuracy in financial records - skills directly transferable to the ownership of financial reporting and monitoring across legal entities that this role demands. My experience navigating complex post-trade operations gave me exposure to how assets and liabilities flow through an organisation, and I am keen to deepen this understanding within a controllers framework.

My advanced Excel/VBA capabilities, combined with proficiency in Bloomberg and Refinitiv Eikon, position me well to deliver the high-quality analysis and reporting your team requires. I thrive in challenging, varied environments and am motivated by the opportunity to develop in-depth knowledge of entity structures, investment strategies, and technical accounting requirements. Having briefly stepped away from finance, I return with renewed clarity about my career direction and a strong commitment to building long-term expertise in financial control.

I would welcome the opportunity to discuss how my background aligns with your team's needs. I do require Skilled Worker visa sponsorship and would be happy to provide further details.
