I am writing to express my strong interest in the Corporate Treasury - GCLA Analyst position at Goldman Sachs. With 2.5 years of experience at Morgan Stanley's Prime Brokerage division and a Master's degree in Investment & Risk Finance (Distinction), I bring a solid foundation in financial operations, risk management, and quantitative analysis directly relevant to this role.

At Morgan Stanley, I developed deep expertise in trade settlement, reconciliation, and post-trade operations-work that required meticulous attention to the firm's financial resources and an understanding of how business activity, market movements, and regulatory requirements impact liquidity and funding. Managing corporate actions and resolving complex trade breaks sharpened my ability to analyse risk, collaborate across teams, and ensure accurate reporting under tight deadlines. These experiences align closely with Corporate Treasury's mandate of managing funding, liquidity, and asset-liability positioning in a constantly evolving environment.

My advanced proficiency in Excel/VBA, Bloomberg, and Refinitiv Eikon enables me to perform the quantitative analysis central to this role, while my MSc coursework in portfolio management, derivatives, and financial risk provides the theoretical grounding to contribute meaningfully to liquidity portfolio yield enhancement and liability planning. I am a collaborative problem-solver who thrives in fast-paced, analytically demanding settings.

I am eager to bring my financial services experience back into a front-office treasury function at Goldman Sachs and would welcome the opportunity to discuss how my background can support the team's objectives. I would require Skilled Worker visa sponsorship.

I look forward to the opportunity to speak with you.
