I am writing to express my strong interest in the Liquidity Trade Operations Analyst position within Global Banking & Markets at Goldman Sachs. With 2.5 years of post-trade operations experience at Morgan Stanley's Prime Brokerage division and a Master's degree in Investment & Risk Finance (Distinction), I am eager to return to my finance career in a role that aligns precisely with my expertise and ambitions.

At Morgan Stanley in Glasgow, I worked across trade settlement, daily reconciliation, and corporate actions processing within a fast-paced Prime Brokerage environment. I developed a deep understanding of the trade lifecycle, built proficiency in resolving breaks and managing risk across multiple asset classes, and collaborated closely with trading desks and counterparties to ensure seamless operational flow. My experience with repo-adjacent instruments and securities financing gives me direct insight into the liquidity operations landscape this role supports.

I bring advanced Excel/VBA skills, hands-on experience with Bloomberg, CTM, and Refinitiv Eikon, and a process-improvement mindset shaped by working within rigorous controls frameworks. My recent period in an advertising account management role has further sharpened my client communication, stakeholder management, and problem-solving abilities-skills that complement the partnership-driven culture Goldman Sachs Operations is known for.

I am confident I can contribute meaningfully to your team from day one and would welcome the opportunity to discuss how my background fits your needs. I do require Skilled Worker visa sponsorship and understand Goldman Sachs supports this. I would be delighted to speak further at your convenience.
