I am writing to express my strong interest in the Private Wealth Management Financial Analyst position at Goldman Sachs. With 2.5 years of experience at Morgan Stanley's Prime Brokerage division and a Master's degree in Investment & Risk Finance (Distinction) from the University of Westminster, I bring a solid foundation in financial markets, client-facing operations, and investment processes that aligns well with PWM's mission of building and preserving client wealth.

At Morgan Stanley, I developed deep expertise in trade settlement, reconciliation, corporate actions, and post-trade operations across multiple asset classes. This experience gave me a thorough understanding of the trade lifecycle and investment products-knowledge directly applicable to constructing and implementing customised asset allocation strategies for high net worth clients. Working within a prime brokerage environment also sharpened my ability to manage complex client relationships and deliver precision under pressure.

My technical proficiency in advanced Excel/VBA, Bloomberg, CTM, and Refinitiv Eikon enables me to analyse portfolios, model risk scenarios, and generate insights that support informed investment decisions. My academic grounding in risk finance further equips me to evaluate opportunities within each client's unique risk tolerance-a core element of the PWM mandate. Though I briefly explored a role in advertising, this experience strengthened my client management and communication skills, reinforcing my commitment to returning to finance where my expertise and passion lie.

I would welcome the opportunity to contribute to Goldman Sachs' Private Wealth Management team and am happy to discuss my background further. I do require Skilled Worker visa sponsorship.
