I am writing to express my strong interest in the Investment Operations Initiatives Delivery Manager role at Legal & General Investment Management. With direct experience in post-trade operations at Morgan Stanley's Prime Brokerage division and a postgraduate qualification in Investment & Risk Finance, I am confident I can contribute meaningfully to your operating model change initiatives.

During my 2.5 years at Morgan Stanley in Glasgow, I gained hands-on experience across the full post-trade lifecycle - managing daily trade settlements for OTC and exchange-traded derivatives, performing reconciliations, processing corporate actions, and coordinating with counterparties and custodians to resolve trade breaks. I worked closely with technology and front office teams to implement process improvements, and I understand the complexities of operating within outsourced and multi-stakeholder environments. My experience included working with platforms such as Bloomberg, CTM, and Refinitiv Eikon, and I developed strong skills in stakeholder communication across different seniority levels.

My MSc in Investment & Risk Finance (Distinction) from the University of Westminster has deepened my understanding of derivatives, risk frameworks, and the regulatory landscape that shapes operational processes. Combined with my practical experience, I bring both the subject matter expertise and the delivery mindset needed to drive initiatives from design through to operational readiness.

I am particularly drawn to LGIM's scale and reputation in asset management, and the opportunity to shape how Investment Operations evolves. I am eager to apply my post-trade knowledge and collaborative approach to delivering impactful change within your team.

I would welcome the opportunity to discuss how my background aligns with your needs.
