I am writing to express my strong interest in the Operations Manager position at your specialist asset management group. With 2.5 years of hands-on operations experience at Morgan Stanley's Prime Brokerage division and a Master's degree in Investment & Risk Finance (Distinction), I am eager to return to my core strength in investment operations and contribute to scaling your platform during this exciting growth phase.

At Morgan Stanley, I managed end-to-end operational processes across trade settlement, daily reconciliation, corporate actions, and post-trade lifecycle management - working across multiple counterparties and portfolios in a fast-paced environment. I developed strong proficiency in Bloomberg, CTM, and Refinitiv Eikon, alongside advanced Excel/VBA skills that I used to streamline workflows and improve operational efficiency. This experience gave me a solid foundation in the fund operations, process oversight, and cross-functional coordination that your role demands.

My time as an Advertising Account Manager has further sharpened my stakeholder management, project delivery, and team coordination skills - competencies directly transferable to a 360-degree operations role supporting a COO. I thrive in lean, high-calibre teams where versatility and ownership are valued, which aligns well with your compact, experienced group managing over USD 3 billion in AUM across multiple jurisdictions.

I should note that I would require Skilled Worker visa sponsorship. I would welcome the opportunity to discuss how my operational expertise and drive to build scalable processes can support your continued growth.

I look forward to hearing from you.
