I am writing to express my strong interest in the Investor Relations Operations role at your client's private equity firm. With 2.5 years of operations experience at Morgan Stanley's Prime Brokerage division and a postgraduate degree in Investment & Risk Finance (Distinction), I am eager to bring my institutional financial operations expertise to a market-leading private equity platform.

At Morgan Stanley in Glasgow, I developed deep proficiency in trade settlement, reconciliation, corporate actions processing, and post-trade operations-skills directly transferable to the operational demands of investor relations in a firm managing over ?30BN in assets. I became adept at managing complex workflows with precision, coordinating across multiple stakeholders, and ensuring accuracy in high-volume, deadline-driven environments. My technical capabilities in Excel/VBA, Bloomberg, and trade lifecycle management equip me to support the data-intensive reporting and operational processes central to LP communications and fund administration.

Having briefly explored a different sector, I am firmly committed to returning to institutional finance, where my skills and passion align. The operational backbone of investor relations-capital call processing, distribution notices, investor onboarding, and portfolio reporting-resonates strongly with my experience managing complex financial workflows. I am particularly drawn to this opportunity because it combines operational rigour with client-facing exposure within a firm of exceptional reputation and scale.

I would require Skilled Worker visa sponsorship and would welcome the opportunity to discuss how my background can contribute to your client's investor relations team. I am available for an interview at your convenience and look forward to hearing from you.
