I am writing to express my keen interest in the Renewal Operations Manager position at Sapiens. With a blend of financial services operations experience and client-facing account management expertise, I bring a strong foundation in stakeholder coordination, commercial engagement, and data-driven decision-making that aligns well with this role.

In my current role as an Advertising Account Manager, I manage a portfolio of client accounts end-to-end - owning renewal conversations, coordinating with internal teams, tracking revenue pipelines, and proactively engaging clients to reinforce value and drive retention. I regularly manage contract negotiations, pricing discussions, and CRM data to ensure accurate forecasting and reporting. This commercial, client-facing experience maps directly to the renewal execution and customer engagement responsibilities you have outlined.

Prior to this, I spent 2.5 years at Morgan Stanley in Prime Brokerage operations, where I developed strong analytical capabilities, attention to detail, and the ability to work cross-functionally in a fast-paced, global environment. I managed daily reconciliations, tracked performance metrics, and collaborated with multiple stakeholders across front office, technology, and external counterparties. My MSc in Investment and Risk Finance (Distinction) from the University of Westminster further strengthens my ability to understand the financial services and insurance landscape that Sapiens serves.

I am particularly drawn to Sapiens as a global leader in insurance technology, and the opportunity to combine my operational rigour with my client management skills to drive renewal outcomes and support recurring revenue growth. I am comfortable engaging directly with customers, managing commercial terms, and identifying process improvements - all of which are central to this role.

I would welcome the opportunity to discuss how my experience aligns with your team's needs.
