I am writing to express my strong interest in the Analyst, Business Operations position. With 2.5 years of experience in Prime Brokerage Operations at Morgan Stanley and a Master's degree in Investment & Risk Finance (Distinction), I bring a solid foundation in financial operations, process efficiency, and data-driven problem-solving that aligns well with this role.

At Morgan Stanley in Glasgow, I managed end-to-end trade settlement and reconciliation across equities and fixed income, resolved complex breaks by liaising with counterparties and internal teams, and processed corporate actions with meticulous attention to detail. This experience gave me a thorough understanding of business operations within financial services-including workflow optimisation, stakeholder coordination, and maintaining accuracy under tight deadlines. My advanced proficiency in Excel/VBA, Bloomberg, and platforms like CTM and Refinitiv Eikon enables me to analyse operational data, identify inefficiencies, and implement scalable improvements.

I am currently working as an Advertising Account Manager, which has sharpened my client communication, project management, and commercial awareness. However, my passion remains firmly in financial services, and I am eager to return to a role where I can apply my technical and operational expertise to drive business performance. I am confident that my blend of hands-on operations experience and analytical skill set would allow me to contribute meaningfully from day one.

I would welcome the opportunity to discuss how my background aligns with your team's needs. I do require Skilled Worker visa sponsorship and am happy to provide further details at your convenience.

I look forward to hearing from you.
