I am writing to express my strong interest in the Analyst, Systematic Credit Investment Operations role. With 2.5 years of post-trade operations experience at Morgan Stanley's Prime Brokerage division and a Master's degree in Investment & Risk Finance (Distinction), I am eager to bring my expertise back to the financial services industry in a role that aligns directly with my professional background.

At Morgan Stanley in Glasgow, I developed deep proficiency across the trade lifecycle, managing trade settlement, daily reconciliation, and corporate actions processing for complex multi-asset portfolios. I collaborated closely with front-office teams, counterparties, and middle-office functions to resolve breaks, ensure accurate position-keeping, and maintain operational integrity within tight deadlines. This experience gave me a strong understanding of how systematic investment strategies depend on robust, precise operational support.

My technical skills-including advanced Excel/VBA, Bloomberg, CTM, and Refinitiv Eikon-complement my ability to analyse large datasets, identify discrepancies, and implement process improvements. My MSc coursework in portfolio theory, derivatives, and risk management provides me with the analytical framework to understand credit instruments and systematic strategies at a deeper level. While I have spent the past year in an advertising account management role, this experience has sharpened my client communication and project coordination skills, and has reinforced my commitment to returning to finance operations.

I would welcome the opportunity to discuss how my background can contribute to your team. I do require Skilled Worker visa sponsorship and am happy to provide further details. Thank you for your consideration.
