I am writing to express my strong interest in the Assistant Administrator - Regulatory Reporting (Fund Services) role. With 2.5 years of post-trade operations experience at Morgan Stanley's Prime Brokerage division and a Master's degree in Investment & Risk Finance (Distinction), I am well-positioned to contribute to your fund services team from day one.

At Morgan Stanley in Glasgow, I developed a thorough understanding of the trade lifecycle, managing daily trade settlement, reconciliation, and corporate actions across multiple asset classes. This work demanded meticulous attention to detail, strict adherence to regulatory deadlines, and the ability to identify and resolve discrepancies swiftly—skills directly transferable to regulatory reporting within fund administration. I routinely collaborated with counterparties, custodians, and internal stakeholders to ensure accurate and timely processing, giving me a solid foundation in the controls and governance frameworks that underpin compliant reporting.

My advanced proficiency in Excel and VBA, combined with experience using Bloomberg, CTM, and Refinitiv Eikon, enables me to handle large datasets efficiently, automate routine processes, and support accurate report generation. I am eager to apply these technical capabilities alongside my operational knowledge to ensure precise, timely regulatory submissions for your fund clients.

I am currently on a Skilled Worker visa and would require sponsorship. I would welcome the opportunity to discuss how my experience in financial operations and passion for fund services can add value to your team.
