I am writing to express my strong interest in the Associate/Managing Associate position within the Regulated Banking & Payments team. With 2.5 years of experience at Morgan Stanley's Prime Brokerage division and a Master's degree in Investment & Risk Finance (Distinction), I bring a solid foundation in financial services operations, regulatory frameworks, and the mechanics of how transactions flow through complex banking infrastructure.

At Morgan Stanley, I worked at the intersection of trade settlement, reconciliation, and post-trade operations-gaining first-hand understanding of how regulatory requirements shape operational processes across banking and payments ecosystems. I managed corporate actions, ensured compliance with settlement protocols, and developed advanced Excel/VBA solutions to enhance accuracy and efficiency. This experience gave me a keen appreciation for the regulatory landscape governing financial institutions and the critical importance of precision in banking operations.

I am now seeking to leverage this operational and regulatory knowledge in a legal and advisory context, where my technical understanding of trade lifecycles, financial instruments, and banking infrastructure can add immediate value. My ability to interpret complex regulatory frameworks, combined with proficiency in Bloomberg, CTM, and Refinitiv Eikon, positions me to contribute meaningfully to client matters involving banking regulation and payments law.

I should note that I would require Skilled Worker visa sponsorship. I am confident that my specialist financial services background and dedication to this field make me a strong candidate, and I would welcome the opportunity to discuss how my experience aligns with your team's needs.

I look forward to hearing from you.
