I am writing to express my strong interest in the Business Analyst (Functional Regulatory Reporting) role. With 2.5 years of experience at Morgan Stanley's Prime Brokerage division in Glasgow, where I worked extensively across trade settlement, reconciliation, and post-trade operations, I bring a solid foundation in the financial processes and data flows that underpin regulatory reporting requirements.

At Morgan Stanley, I developed deep familiarity with the trade lifecycle—from execution through settlement and corporate actions processing—which gives me a practical understanding of the source data, business rules, and exception handling critical to accurate regulatory reporting. My daily work involved identifying discrepancies, liaising with multiple stakeholders to resolve breaks, and ensuring data integrity across systems—skills directly transferable to analysing and refining reporting frameworks. I am proficient in advanced Excel/VBA, Bloomberg, CTM, and Refinitiv Eikon, and comfortable translating complex business requirements into functional specifications.

I hold an MSc in Investment & Risk Finance (Distinction) from the University of Westminster, which strengthened my understanding of financial regulation and risk frameworks. After a brief period in a different sector, I am eager to return to financial services in a role that combines my analytical capabilities with my operational expertise. I am confident that my background positions me well to bridge the gap between business users, technology teams, and regulatory demands.

I would welcome the opportunity to discuss how my experience aligns with your team's needs. I do require Skilled Worker visa sponsorship and am happy to provide further details.

I look forward to hearing from you.
