I am writing to express my strong interest in the Client Service Operations role. With 2.5 years of experience in Prime Brokerage Operations at Morgan Stanley, Glasgow, I bring a solid foundation in trade settlement, reconciliation, corporate actions, and post-trade lifecycle management-skills directly aligned with the operational and client-facing demands of this position.

At Morgan Stanley, I developed a meticulous approach to managing complex workflows across multiple counterparties, ensuring timely and accurate trade resolution while maintaining strong relationships with internal stakeholders and external clients. My daily responsibilities required clear communication, problem-solving under pressure, and a commitment to service excellence-qualities I understand are central to client service operations. I am proficient in Excel/VBA, Bloomberg, CTM, and Refinitiv Eikon, enabling me to work efficiently within data-intensive environments.

I hold an MSc in Investment & Risk Finance (Distinction) from the University of Westminster, which deepened my understanding of financial markets and risk frameworks. After a brief period in advertising-where I honed client management and commercial awareness-I am eager to return to financial services, where my technical expertise and operational experience can deliver the most value.

I would welcome the opportunity to discuss how my background can contribute to your team's success. I do require Skilled Worker visa sponsorship and am happy to provide further details. Thank you for considering my application-I look forward to the possibility of connecting.
