I am writing to express my strong interest in the Collateral Management Officer position. With 2.5 years of post-trade operations experience at Morgan Stanley's Prime Brokerage division in Glasgow, I bring directly relevant expertise in the processes that underpin effective collateral management.

In my role at Morgan Stanley, I managed trade settlement, daily reconciliation, and corporate actions processing across complex multi-asset portfolios. This work required meticulous attention to margin calls, position monitoring, and counterparty exposure - core competencies that translate directly to collateral management. I developed advanced Excel/VBA solutions to streamline reconciliation workflows and regularly utilised Bloomberg, CTM, and Refinitiv Eikon to support accurate and timely operations across the trade lifecycle.

I hold an MSc in Investment & Risk Finance (Distinction) from the University of Westminster, which provided me with a strong theoretical grounding in risk mitigation, portfolio valuation, and financial regulation - all essential to effective collateral oversight. After a brief period in a different sector, I am focused on returning to financial services where my skills and passion are best applied.

I am confident that my combination of hands-on prime brokerage experience, technical proficiency, and academic foundation makes me a strong fit for this role. I would welcome the opportunity to discuss how I can contribute to your team. I would require Skilled Worker visa sponsorship and am happy to provide further details on this at your convenience.

I look forward to hearing from you.
