I am writing to express my strong interest in the Commodity Operations Analyst position. With 2.5 years of post-trade operations experience at Morgan Stanley's Prime Brokerage division and a Master's degree in Investment & Risk Finance (Distinction), I am well-positioned to contribute meaningfully to your commodities operations team.

At Morgan Stanley in Glasgow, I developed deep expertise across the trade lifecycle-managing trade settlement, daily reconciliation, and corporate actions processing across multiple asset classes. I built robust workflows using advanced Excel and VBA to streamline exception management and reduce settlement failures, while utilising platforms including Bloomberg, CTM, and Refinitiv Eikon to ensure accurate and timely trade processing. This experience gave me a strong foundation in operational risk management, counterparty coordination, and the meticulous attention to detail that commodity operations demands.

I am eager to apply these transferable skills within a commodities-focused environment, where I can leverage my understanding of settlement cycles, break resolution, and cross-functional collaboration. My academic grounding in risk finance complements my practical experience and equips me to navigate the nuances of commodity market operations. Having briefly stepped into an advertising role, I am now firmly committed to returning to financial operations-the environment where my skills, training, and professional passion align.

I would welcome the opportunity to discuss how my background can support your team's objectives. I do require Skilled Worker visa sponsorship and am happy to provide further details at your convenience.
