I am writing to express my strong interest in the Associate Product Controller position within the Controllers division in London. With 2.5 years of experience at Morgan Stanley's Prime Brokerage division and a Master's degree in Investment & Risk Finance (Distinction), I am eager to return to my core strength in financial services and contribute meaningfully to this team.

During my tenure at Morgan Stanley in Glasgow, I developed deep expertise across the trade lifecycle, including trade settlement, daily reconciliation, post-trade operations, and corporate actions processing. This hands-on experience gave me a strong understanding of P&L attribution, product valuation, and the importance of robust controls-skills directly applicable to a Product Controller role. I am proficient in Excel/VBA, Bloomberg, CTM, and Refinitiv Eikon, and am comfortable working with large datasets to identify breaks and resolve discrepancies under tight deadlines.

While I have spent the past year in an advertising account management role, this experience has sharpened my stakeholder communication, project coordination, and analytical problem-solving abilities-complementary skills I would bring to cross-functional collaboration with trading desks, operations, and finance teams. My commitment to a career in finance remains unwavering, and this role represents the ideal opportunity to leverage my technical foundation in a front-office-aligned control function.

I would welcome the opportunity to discuss how my background aligns with your team's needs. I would require Skilled Worker visa sponsorship and am happy to provide further details. I look forward to hearing from you.
