I am writing to express my strong interest in the Corporate Treasury - Bank Relationship Management Analyst/Associate position in London. With 2.5 years of experience at Morgan Stanley's Prime Brokerage division and a Master's degree in Investment & Risk Finance (Distinction), I bring a solid foundation in financial operations, counterparty engagement, and institutional banking processes directly relevant to this role.

At Morgan Stanley in Glasgow, I managed trade settlement, reconciliation, and corporate actions across the post-trade lifecycle, working closely with internal stakeholders and external counterparties to resolve discrepancies and ensure seamless operational flow. This experience gave me a strong understanding of banking relationships from an operational and risk perspective-skills that translate naturally into treasury and bank relationship management, where maintaining robust counterparty communications, monitoring exposures, and supporting strategic banking partnerships are central.

My technical proficiency in Excel/VBA, Bloomberg, CTM, and Refinitiv Eikon enables me to analyse data efficiently, track banking metrics, and support decision-making with precision. My MSc programme deepened my understanding of financial risk, liquidity management, and capital markets-areas fundamental to corporate treasury functions. Additionally, my recent experience in account management has sharpened my client relationship and communication skills, reinforcing my ability to manage multiple banking relationships with professionalism and commercial awareness.

I am eager to return to financial services in a role that leverages both my technical expertise and relationship management capabilities. I would require Skilled Worker visa sponsorship and would welcome the opportunity to discuss how my background aligns with your team's needs.

I look forward to the opportunity to contribute to your treasury function.
