I am writing to express my strong interest in the Deal/Loan Operations role with a Loan Agency background. With 2.5 years of post-trade operations experience at Morgan Stanley's Prime Brokerage division in Glasgow, I am eager to bring my expertise in trade settlement, reconciliation, and operational workflows back into financial services.

At Morgan Stanley, I managed end-to-end trade settlement processes, performed daily reconciliations across multiple asset classes, and handled corporate actions processing-all within a fast-paced, high-volume environment demanding precision and strict adherence to deadlines. These responsibilities directly align with the operational rigour required in loan agency work, where accuracy in deal setup, payment processing, and stakeholder coordination is critical. My familiarity with the trade lifecycle, coupled with advanced Excel/VBA skills and proficiency in Bloomberg, CTM, and Refinitiv Eikon, positions me well to contribute effectively from day one.

I hold an MSc in Investment & Risk Finance (Distinction) from the University of Westminster, which provided me with a strong grounding in financial instruments, credit markets, and risk frameworks-knowledge highly relevant to loan operations. While I briefly transitioned into an advertising account management role, this experience sharpened my client relationship and project coordination skills, both valuable in an agency-facing capacity.

I am currently on a Skilled Worker visa and would require sponsorship. I would welcome the opportunity to discuss how my operations background and technical skills can support your team's objectives.

I look forward to hearing from you.
