I am writing to express my strong interest in the EMEA Servicer Evaluations role. With 2.5 years of post-trade operations experience at Morgan Stanley's Prime Brokerage division and a Master's degree in Investment & Risk Finance (Distinction), I bring a solid foundation in evaluating operational processes, assessing risk, and maintaining the high standards of accuracy that servicer evaluations demand.

At Morgan Stanley in Glasgow, I was responsible for trade settlement, daily reconciliation, and corporate actions processing across multiple asset classes. This role required me to critically assess counterparty performance, identify discrepancies, and escalate issues-skills directly transferable to evaluating servicer capabilities, compliance, and operational effectiveness across the EMEA region. My experience navigating complex post-trade workflows gives me a strong understanding of what constitutes robust servicing standards.

I am proficient in Excel/VBA, Bloomberg, CTM, and Refinitiv Eikon, and comfortable working with large datasets to produce analytical assessments. My MSc dissertation focused on risk modelling, reinforcing my ability to apply structured, evidence-based frameworks-an approach I would bring to servicer evaluation methodologies. Though I briefly explored a different industry, I am firmly committed to returning to financial services where my expertise and passion lie.

I would welcome the opportunity to discuss how my operational background and analytical rigour can contribute to your EMEA evaluations team. I do require Skilled Worker visa sponsorship and am happy to provide further details. I look forward to hearing from you.
