I am writing to express my strong interest in the Finance Manager, Operations position. With 2.5 years of post-trade operations experience at Morgan Stanley's Prime Brokerage division and a Master's degree in Investment & Risk Finance (Distinction), I bring a solid foundation in financial operations, reconciliation, and process management that aligns well with this role.

At Morgan Stanley in Glasgow, I managed end-to-end trade settlement across equities and fixed income, performed daily reconciliations, resolved breaks with counterparties, and processed corporate actions-all within a high-volume, deadline-driven environment. I developed advanced Excel/VBA tools to streamline workflows and reduce manual errors, and I collaborated cross-functionally with front office, middle office, and external stakeholders to ensure operational accuracy. Working with platforms including Bloomberg, CTM, and Refinitiv Eikon gave me strong technical fluency across the trade lifecycle.

After a brief period in a client-facing commercial role, I am eager to return to financial operations where my analytical strengths and industry knowledge deliver the most impact. My experience managing operational risk, driving process improvements, and maintaining rigorous controls positions me well for a managerial step within a finance operations team. I am detail-oriented, commercially aware, and motivated to contribute at a higher level of responsibility.

I would welcome the opportunity to discuss how my background can add value to your team. I do require Skilled Worker visa sponsorship and am happy to provide further details. I look forward to hearing from you.
