I am writing to express my strong interest in the Financial Analyst position. With 2.5 years of experience at Morgan Stanley's Prime Brokerage division and a Master's degree in Investment & Risk Finance (Distinction) from the University of Westminster, I am eager to return to the financial services sector where my analytical skills and market knowledge can deliver immediate value.

At Morgan Stanley in Glasgow, I developed a robust foundation in financial analysis through trade settlement, reconciliation, and post-trade operations across multiple asset classes. I managed corporate actions processing, identified discrepancies through detailed data analysis, and collaborated with global teams to resolve complex issues under tight deadlines. This role sharpened my ability to interpret financial data, assess risk exposure, and communicate findings clearly to stakeholders—skills directly transferable to a Financial Analyst position.

My technical toolkit includes advanced Excel and VBA modelling, Bloomberg Terminal, Refinitiv Eikon, and CTM, complemented by a thorough understanding of the trade lifecycle and financial markets. My MSc programme further strengthened my quantitative abilities in portfolio analysis, risk management, and financial modelling. While I am currently working in advertising account management, this experience has enhanced my client communication, strategic thinking, and project management capabilities—adding a commercial perspective to my analytical strengths.

I am highly motivated to contribute to your team and would welcome the opportunity to discuss how my background aligns with your needs. I do require Skilled Worker visa sponsorship and am happy to provide further details. Thank you for your consideration—I look forward to hearing from you.
