I am writing to express my strong interest in the Financial Planning & Analysis Manager - Group Corporate Treasury role. With 2.5 years of experience at Morgan Stanley's Prime Brokerage division and a Master's degree in Investment & Risk Finance (Distinction), I bring a solid foundation in financial analysis, risk assessment, and corporate treasury operations that directly aligns with this position.

At Morgan Stanley in Glasgow, I developed deep expertise in trade settlement, reconciliation, and post-trade operations across multiple asset classes. I managed complex corporate actions, identified discrepancies through detailed financial analysis, and collaborated with cross-functional teams to ensure accurate reporting and risk mitigation. This experience gave me a thorough understanding of cash flows, liquidity management, and the financial controls essential to a corporate treasury function. My advanced proficiency in Excel/VBA, Bloomberg, and Refinitiv Eikon enables me to build robust financial models, automate reporting processes, and deliver data-driven insights to support strategic decision-making.

I am currently working as an Advertising Account Manager, which has sharpened my stakeholder management, strategic planning, and communication skills-competencies that complement my technical finance background and are critical for an FP&A leadership role. I am eager to return to financial services and apply my combined analytical rigour and commercial awareness to drive treasury planning and performance.

I would welcome the opportunity to discuss how my experience can contribute to your team's objectives. I do require Skilled Worker visa sponsorship and am happy to provide further details. I look forward to hearing from you.
