I am writing to express my strong interest in the Fund Accountant position. With 2.5 years of experience in Prime Brokerage operations at Morgan Stanley and a Master's degree in Investment & Risk Finance (Distinction), I am eager to transition back into a finance role where I can apply my technical expertise to fund accounting.

During my time at Morgan Stanley in Glasgow, I developed a thorough understanding of the trade lifecycle, including trade settlement, daily reconciliation, corporate actions processing, and post-trade operations across multiple asset classes. This experience gave me a strong foundation in accuracy-driven, deadline-sensitive financial processes-skills directly transferable to NAV calculation, portfolio reconciliation, and fund valuation. I am proficient in Excel/VBA, Bloomberg, CTM, and Refinitiv Eikon, and I am comfortable working with large datasets and complex financial instruments.

My MSc in Investment & Risk Finance further strengthened my understanding of portfolio theory, derivatives pricing, and financial reporting frameworks, providing the analytical rigour that fund accounting demands. While I have spent a brief period in an advertising account management role, this experience has sharpened my client communication and stakeholder management skills, which I believe add value in a client-facing fund accounting environment.

I am highly motivated to return to financial services and contribute meaningfully to your team. I would welcome the opportunity to discuss how my background aligns with your needs. I should note that I require Skilled Worker visa sponsorship, and I am happy to provide further details on this at your convenience.

I look forward to hearing from you.
