I am writing to express my strong interest in the Futures Middle Office Associate position. With 2.5 years of post-trade operations experience at Morgan Stanley's Prime Brokerage division and a Master's degree in Investment & Risk Finance (Distinction), I am well-positioned to contribute effectively to your team from day one.

At Morgan Stanley in Glasgow, I developed deep expertise in trade settlement, daily reconciliation, and corporate actions processing across multi-asset products. I worked closely with front office, clearinghouses, and counterparties to resolve trade breaks and ensure seamless post-trade workflows—skills directly transferable to a futures middle office environment where accuracy, timeliness, and cross-functional collaboration are critical. My proficiency in Excel/VBA, Bloomberg, CTM, and Refinitiv Eikon enables me to analyse large datasets efficiently and identify discrepancies before they escalate.

I am currently working as an Advertising Account Manager, a role that has sharpened my stakeholder management and communication skills. However, my passion remains firmly in financial markets operations, and I am eager to return to the industry where my technical expertise and operational mindset can deliver the most value. The fast-paced, detail-oriented nature of futures clearing and settlement aligns perfectly with my experience and professional ambitions.

I should note that I would require Skilled Worker visa sponsorship for this role. I would welcome the opportunity to discuss how my background in prime brokerage operations translates directly to your futures middle office function, and how I can add immediate value to your team.
