I am writing to express my strong interest in the GRM Enterprise & Operational Risk Analyst position. With 2.5 years of experience at Morgan Stanley's Prime Brokerage division in Glasgow and an MSc in Investment & Risk Finance (Distinction) from the University of Westminster, I bring a solid foundation in identifying, assessing, and mitigating operational risk within complex financial environments.

At Morgan Stanley, I worked extensively across trade settlement, reconciliation, and corporate actions processing-functions where operational risk management is embedded in daily decision-making. I developed a keen understanding of post-trade lifecycle vulnerabilities, failed trade escalation protocols, and the importance of robust controls frameworks. My experience reconciling discrepancies across multiple counterparties sharpened my analytical rigour and attention to detail, while collaborating with front office, compliance, and technology teams gave me a holistic view of enterprise risk interdependencies.

My technical proficiency in Excel/VBA, Bloomberg, CTM, and Refinitiv Eikon enables me to interrogate large datasets, identify emerging risk patterns, and support reporting requirements efficiently. My postgraduate studies deepened my understanding of risk modelling, regulatory frameworks, and quantitative analysis-skills directly applicable to enterprise risk assessment and scenario planning.

I am eager to return to financial services in a role that leverages both my operational expertise and academic grounding in risk. I would require Skilled Worker visa sponsorship and am happy to discuss this further. I would welcome the opportunity to contribute to your risk function and am available for an interview at your convenience.

Thank you for considering my application-I look forward to hearing from you.
