I am writing to express my strong interest in the Global Banking & Markets - Liquidity Trade Operations Analyst position at Goldman Sachs. With 2.5 years of post-trade operations experience at Morgan Stanley's Prime Brokerage division and a Master's degree in Investment & Risk Finance (Distinction), I am well-positioned to contribute to your team from day one.

At Morgan Stanley in Glasgow, I developed deep expertise across the trade lifecycle, managing daily trade settlement, break resolution, and reconciliation processes for prime brokerage clients. I processed corporate actions, liaised with counterparties and internal stakeholders to resolve discrepancies, and consistently met strict settlement deadlines in a high-volume, time-sensitive environment. This experience gave me a thorough understanding of liquidity flows, funding mechanisms, and the operational controls critical to a global markets operation.

I bring advanced proficiency in Excel/VBA, Bloomberg, CTM, and Refinitiv Eikon, combined with a strong analytical mindset honed through both my academic training and hands-on experience navigating complex multi-asset workflows. While I briefly pivoted into an advertising account management role, this sharpened my client communication and stakeholder management skills-and confirmed my commitment to building a long-term career in financial services operations.

I am eager to bring my technical skills, operational rigour, and passion for markets to Goldman Sachs' Liquidity Trade Operations team. I hold a Skilled Worker visa and would require sponsorship. I would welcome the opportunity to discuss how my background aligns with your needs.

Thank you for your consideration-I look forward to hearing from you.
