I am writing to express my strong interest in the Investment Operations Initiatives Delivery Manager role. With 2.5 years of hands-on experience in Prime Brokerage operations at Morgan Stanley, Glasgow, combined with an MSc in Investment & Risk Finance (Distinction) from the University of Westminster, I bring a solid foundation in post-trade operations and a genuine passion for driving operational excellence in investment management.

At Morgan Stanley, I managed end-to-end trade settlement, daily reconciliation, and corporate actions processing across multiple asset classes. I developed a deep understanding of the trade lifecycle and built proficiency in identifying process inefficiencies-skills directly applicable to delivering operational initiatives and change programmes. My advanced Excel/VBA capabilities enabled me to streamline reporting workflows, while my experience with Bloomberg, CTM, and Refinitiv Eikon gave me fluency in the systems that underpin investment operations.

What excites me about this role is the opportunity to combine my operational expertise with initiative delivery-bridging the gap between strategic goals and day-to-day execution. Having navigated complex stakeholder environments at Morgan Stanley and subsequently managed client accounts in a fast-paced commercial setting, I am well-equipped to coordinate cross-functional teams, manage project timelines, and communicate effectively at all levels. I am eager to bring this blend of technical knowledge and delivery focus back to the finance sector.

I would welcome the opportunity to discuss how my background aligns with your team's objectives. I do require Skilled Worker visa sponsorship and am happy to provide further details. I look forward to hearing from you.
