I am writing to express my strong interest in the Investor Relations Operations role at your firm. With 2.5 years of post-trade operations experience at Morgan Stanley's Prime Brokerage division and a Master's degree in Investment & Risk Finance (Distinction), I am eager to bring my financial operations expertise to a market-leading private equity environment.

At Morgan Stanley in Glasgow, I developed a rigorous understanding of trade settlement, reconciliation, and corporate actions processing-skills that translate directly to the operational precision required in investor relations. I managed complex workflows across multiple stakeholders, ensured accuracy under tight deadlines, and built proficiency in Bloomberg, CTM, Refinitiv Eikon, and advanced Excel/VBA. This experience gave me a strong foundation in the trade lifecycle and the meticulous attention to detail that institutional investors expect.

Having briefly explored a different career path, I am now firmly committed to returning to financial services, where my skills and passion align. The opportunity to support investor communications and operational processes within private equity is particularly compelling-it combines my operational rigour with my desire to work closer to investment decision-making and client relationships. I am confident that my ability to manage data-driven processes, liaise across teams, and maintain the highest standards of accuracy would add immediate value to your investor relations function.

I would require Skilled Worker visa sponsorship and would welcome the opportunity to discuss how my background aligns with your team's needs.

I look forward to the opportunity to contribute to your firm's continued success.
