I am writing to express my strong interest in the Loan Asset Management Operations Analyst position. With 2.5 years of post-trade operations experience at Morgan Stanley's Prime Brokerage division and a Master's degree in Investment & Risk Finance (Distinction), I am well-positioned to contribute meaningfully to your loan operations team.

At Morgan Stanley in Glasgow, I developed deep expertise in trade settlement, daily reconciliation, and corporate actions processing-skills directly transferable to loan asset management operations. I managed complex workflows across multiple counterparties, resolved discrepancies under tight deadlines, and ensured accuracy across the trade lifecycle. My proficiency in Excel/VBA, Bloomberg, and reconciliation platforms enabled me to streamline processes and reduce operational risk within my team.

The analytical rigour required in loan operations-tracking payments, managing agent notices, monitoring covenant compliance, and reconciling cash flows-aligns precisely with my background in post-trade processing and portfolio reconciliation. I am eager to apply my structured approach to problem-solving and attention to detail within a loan asset management environment, and I am motivated to deepen my expertise in this asset class.

I should note that I require Skilled Worker visa sponsorship. I would welcome the opportunity to discuss how my operations experience and quantitative skill set can add value to your team.

I look forward to hearing from you.
