I am writing to express my strong interest in the Manager, Market Oversight Strategy (Operational Risks) position. With 2.5 years of experience in Prime Brokerage operations at Morgan Stanley and a Master's degree in Investment & Risk Finance (Distinction), I bring a solid foundation in identifying, managing, and mitigating operational risks within complex market environments.

At Morgan Stanley Glasgow, I worked extensively across trade settlement, reconciliation, and corporate actions processing-functions where operational risk management is paramount. I developed a keen understanding of how breakdowns in post-trade workflows can escalate into broader market and counterparty risks. My role required meticulous attention to control frameworks, exception management, and cross-functional coordination to ensure regulatory compliance and operational resilience across the trade lifecycle.

My technical proficiency in Excel/VBA, Bloomberg, CTM, and Refinitiv Eikon enables me to analyse large datasets, identify risk patterns, and support strategic oversight initiatives. My MSc dissertation and coursework deepened my understanding of systemic risk, market microstructure, and regulatory frameworks-directly relevant to developing and executing market oversight strategy. I am eager to bring both my practical operational experience and academic grounding to a role focused on strengthening oversight and control mechanisms.

I should note that I would require Skilled Worker visa sponsorship. I am confident that my specialist experience in financial operations risk, combined with my genuine passion for market integrity, makes me a strong candidate for this role. I would welcome the opportunity to discuss how my background aligns with your team's objectives.

I look forward to hearing from you.
