I am writing to express my strong interest in the Manager, Treasury Markets (FX) position. With 2.5 years of experience at Morgan Stanley's Prime Brokerage division and a Master's degree in Investment & Risk Finance (Distinction), I bring a solid foundation in trade lifecycle management, market operations, and financial instruments that aligns well with the demands of treasury and FX markets.

At Morgan Stanley in Glasgow, I managed end-to-end trade settlement and reconciliation across multiple asset classes, developed expertise in post-trade operations, and handled corporate actions processing. This role sharpened my understanding of market risk, counterparty exposure, and the operational precision required in fast-moving financial markets. My daily use of Bloomberg, Refinitiv Eikon, and CTM, combined with advanced Excel/VBA skills, enables me to analyse FX positions, automate workflows, and support data-driven decision-making at pace.

Having briefly pivoted into an advertising account management role, I am now firmly committed to returning to financial markets - specifically within treasury and FX, where my quantitative training and operational experience are most impactful. My cross-functional communication skills, client management abilities, and commercial awareness gained during this period complement my technical finance background effectively.

I am enthusiastic about contributing to your Treasury Markets team and am confident my blend of institutional experience, academic rigour, and hands-on market knowledge would add immediate value. I do require Skilled Worker visa sponsorship and am happy to discuss this further. I would welcome the opportunity to speak with you about how I can support your FX operations and strategy.

Thank you for your consideration - I look forward to hearing from you.
