I am writing to express my strong interest in the Manager, Valuations & Forensic Services position. With 2.5 years of experience at Morgan Stanley's Prime Brokerage division and a Master's degree in Investment & Risk Finance (Distinction) from the University of Westminster, I bring a solid foundation in financial analysis, reconciliation, and investigative rigour that translates directly to valuations and forensic work.

At Morgan Stanley, I developed sharp analytical capabilities through daily reconciliation of complex trades, identifying and resolving discrepancies across multi-asset portfolios, and managing corporate actions with precision. This work required meticulous attention to detail, an investigative mindset, and the ability to trace financial flows across systems-skills that are fundamental to forensic services and valuation analysis. My advanced proficiency in Excel/VBA, Bloomberg, and Refinitiv Eikon enables me to efficiently interrogate large datasets and build robust financial models.

My MSc programme deepened my understanding of asset pricing, risk modelling, and portfolio valuation methodologies, complementing my practical experience. Additionally, my current role in account management has strengthened my client-facing communication, stakeholder management, and ability to distil complex information into clear narratives-essential when presenting forensic findings or valuation opinions to clients and legal teams.

I am eager to return to financial services in a role that leverages both my technical expertise and analytical instincts. I would require Skilled Worker visa sponsorship and would welcome the opportunity to discuss how my background aligns with your team's needs.

I look forward to the opportunity to contribute to your practice.
