I am writing to express my strong interest in the Middle Office roles within Hedge Funds and Asset Management advertised on eFinancialCareers. With 2.5 years of middle office experience at Morgan Stanley's Prime Brokerage division and a Master's degree in Investment & Risk Finance (Distinction), I am eager to return to my core expertise in post-trade operations within an asset management environment.

At Morgan Stanley in Glasgow, I developed deep proficiency across the trade lifecycle, managing daily trade settlement, break resolution, and multi-asset reconciliation for prime brokerage clients-including hedge fund counterparties. I processed corporate actions, liaised with front office and external custodians to resolve discrepancies, and contributed to process improvements that reduced settlement failures. This experience gave me a strong understanding of the operational rigour and risk awareness that hedge fund and asset management middle offices demand.

My technical toolkit-including advanced Excel/VBA, Bloomberg, CTM, and Refinitiv Eikon-enables me to work efficiently within data-intensive environments and adapt quickly to proprietary systems. My current role in account management has further sharpened my stakeholder communication and problem-solving skills, both of which translate directly to middle office coordination between portfolio managers, traders, and operations teams.

I am based in the UK on a Skilled Worker visa and would require sponsorship from my next employer. I would welcome the opportunity to discuss how my experience aligns with your team's needs and am available for an interview at your convenience.

I look forward to hearing from you.
