I am writing to express my strong interest in the Middle Office Analyst position. With 2.5 years of experience in Prime Brokerage operations at Morgan Stanley, Glasgow, I bring direct expertise in trade settlement, reconciliation, post-trade processing, and corporate actions-core competencies that align closely with the demands of a middle office function.

At Morgan Stanley, I developed a thorough understanding of the trade lifecycle, working across front-to-back processes to ensure accurate and timely settlement, resolve breaks, and manage risk exposure. I collaborated daily with traders, counterparties, and control functions, building the analytical rigour and attention to detail essential for middle office excellence. My technical proficiency in Excel/VBA, Bloomberg, CTM, and Refinitiv Eikon enables me to work efficiently with large datasets, automate workflows, and support reporting requirements.

I hold an MSc in Investment & Risk Finance (Distinction) from the University of Westminster, which reinforced my quantitative and risk management foundations. While I have spent a brief period outside finance in an advertising account management role, this experience sharpened my client communication and stakeholder management skills-and has only strengthened my commitment to returning to financial services, where my passion and expertise lie.

I would welcome the opportunity to contribute my operational knowledge and analytical capabilities to your team. I do require Skilled Worker visa sponsorship and am happy to discuss this further. I would be delighted to explore how my background can add value to your organisation.

Thank you for your consideration-I look forward to the opportunity to connect.
