I am writing to express my strong interest in the Middle Office Analyst position within your Insurance Linked Securities team. With 2.5 years of middle office experience at Morgan Stanley's Prime Brokerage division and a Master's degree in Investment & Risk Finance (Distinction), I am eager to bring my operational expertise back to the financial services sector in a specialised and intellectually stimulating asset class.

At Morgan Stanley in Glasgow, I was responsible for trade settlement, daily reconciliation, and corporate actions processing across multiple asset classes. I developed a thorough understanding of the post-trade lifecycle, working closely with front office, counterparties, and custodians to resolve breaks and ensure timely, accurate settlement. This experience gave me strong attention to detail, the ability to manage competing priorities under tight deadlines, and confidence navigating complex operational workflows-skills directly transferable to managing the unique settlement and portfolio administration demands of ILS instruments.

My technical proficiency in Excel/VBA, Bloomberg, CTM, and Refinitiv Eikon, combined with my academic grounding in risk and investment theory, positions me well to support portfolio analytics, collateral management, and reporting functions central to this role. I am particularly drawn to ILS as a niche where operational rigour meets fascinating risk modelling challenges, and I am motivated to develop deep expertise in this space.

I would welcome the opportunity to discuss how my background aligns with your team's needs. I do require Skilled Worker visa sponsorship and am happy to provide further details on this. Thank you for your consideration-I look forward to hearing from you.
