I am writing to express my strong interest in the Middle Office Fund Management Associate position. With 2.5 years of post-trade operations experience at Morgan Stanley's Prime Brokerage division and a Master's degree in Investment & Risk Finance (Distinction), I am well-positioned to contribute meaningfully to your fund management operations.

At Morgan Stanley in Glasgow, I developed deep expertise across the trade lifecycle-managing daily trade settlement, reconciliation, and corporate actions processing for complex prime brokerage portfolios. I built strong proficiency in navigating operational risk, resolving trade breaks, and ensuring accurate NAV-impacting processes-skills directly transferable to middle office fund management. My technical toolkit includes advanced Excel/VBA, Bloomberg, CTM, and Refinitiv Eikon, enabling me to work efficiently with large datasets and multiple counterparties.

I am currently in an advertising account management role, which has sharpened my client communication, stakeholder management, and project coordination abilities. However, my passion and career trajectory lie firmly in financial services operations, and this role represents the ideal opportunity to leverage my technical finance background in a fund management environment. The hybrid working model aligns well with my preference for collaborative yet focused work.

I should note that I require Skilled Worker visa sponsorship, and I would welcome the opportunity to discuss how my experience aligns with your team's needs. I am available for interview at your convenience and eager to bring my operational expertise back to the finance industry.

I look forward to hearing from you.
