I am writing to express my strong interest in the OMS Trade Support - Fidessa role. With 2.5 years of post-trade operations experience at Morgan Stanley's Prime Brokerage division and a Master's degree in Investment & Risk Finance (Distinction), I am well-positioned to provide effective technical and operational support within an order management system environment.

At Morgan Stanley in Glasgow, I developed deep expertise across the trade lifecycle-managing trade settlement, daily reconciliation, corporate actions processing, and break resolution across multiple asset classes. I became highly proficient in navigating complex trade flows, liaising with front-office desks, counterparties, and technology teams to ensure seamless post-trade processing. This experience gives me a strong foundation for supporting traders and resolving OMS-related issues within platforms like Fidessa, where understanding order routing, execution workflows, and system connectivity is critical.

My technical skills complement this operational background: I am advanced in Excel/VBA for data analysis and process automation, and experienced with Bloomberg, CTM, and Refinitiv Eikon. I am confident in my ability to quickly master Fidessa's architecture, troubleshoot system issues, and contribute to configuration and testing efforts. Having recently worked in a client-facing account management role, I also bring strengthened communication and stakeholder management skills that translate directly to front-office support.

I am eager to return to financial services and contribute meaningfully to your team. I would require Skilled Worker visa sponsorship and am happy to discuss this further. I would welcome the opportunity to speak with you about how my experience aligns with this role.
