I am writing to express my strong interest in the Onboarding Analyst position. With 2.5 years of experience in Prime Brokerage operations at Morgan Stanley, combined with a Master's degree in Investment & Risk Finance (Distinction), I bring a solid foundation in client-facing financial operations that aligns closely with the demands of this role.

During my tenure at Morgan Stanley's Glasgow office, I developed deep expertise in trade settlement, reconciliation, and post-trade operations-skills that translate directly to understanding the documentation, regulatory, and operational requirements central to client onboarding. I routinely coordinated across multiple teams to resolve discrepancies, ensure compliance with internal controls, and deliver seamless outcomes for institutional clients. This experience gave me a thorough understanding of the end-to-end client lifecycle, KYC/AML frameworks, and the importance of accuracy and timeliness in regulated environments.

My technical proficiency in Excel/VBA, Bloomberg, CTM, and Refinitiv Eikon enables me to manage large datasets, streamline workflows, and identify process improvements-capabilities that are invaluable when navigating the complexity of onboarding institutional clients. My current role as an Advertising Account Manager has further sharpened my stakeholder management, communication, and project coordination skills, reinforcing my ability to manage multiple onboarding workstreams simultaneously.

I am eager to return to financial services and believe this role represents an ideal opportunity to leverage my operational expertise in a client-focused capacity. I do require Skilled Worker visa sponsorship and would welcome the opportunity to discuss how my background can add value to your team.

I look forward to the opportunity to speak further about this role.
