I am writing to express my strong interest in the Operational Change Manager position. With 2.5 years of post-trade operations experience at Morgan Stanley's Prime Brokerage division and a Master's degree in Investment & Risk Finance (Distinction), I bring a solid foundation in operational workflows, process improvement, and the technical understanding needed to drive meaningful change within financial services.

At Morgan Stanley in Glasgow, I managed trade settlement, reconciliation, and corporate actions across the full trade lifecycle. This role required me to identify inefficiencies, collaborate with multiple stakeholders, and implement process enhancements to reduce settlement failures and improve accuracy. Working within a fast-paced, heavily regulated environment gave me firsthand understanding of how operational changes must be carefully planned, communicated, and executed to minimise disruption while delivering measurable results. My advanced proficiency in Excel/VBA, Bloomberg, CTM, and Refinitiv Eikon further enables me to bridge the gap between technical teams and business operations.

I am currently working as an Advertising Account Manager, where I have strengthened my skills in stakeholder management, project coordination, and delivering structured solutions to complex client needs - all directly transferable to change management. However, my passion remains firmly in financial services, and I am eager to return to an environment where I can combine my operational expertise with my ability to lead and embed change.

I would welcome the opportunity to discuss how my background aligns with your needs. I do require Skilled Worker visa sponsorship and am happy to provide further details at your convenience.

I look forward to hearing from you.
