I am writing to express my strong interest in the Operational Risk Reporting Analyst position. With 2.5 years of experience in Prime Brokerage operations at Morgan Stanley and a Master's degree in Investment & Risk Finance (Distinction), I bring a solid foundation in identifying, analysing, and reporting on operational risk within complex financial environments.

At Morgan Stanley Glasgow, I worked extensively across trade settlement, reconciliation, corporate actions, and post-trade operations-areas where operational risk is inherent and vigilance is critical. I developed a keen eye for discrepancies, process failures, and control gaps, regularly escalating issues and contributing to improved workflows. My advanced Excel and VBA skills enabled me to build reporting tools that enhanced data accuracy and supported timely risk identification, while my proficiency with Bloomberg, CTM, and Refinitiv Eikon gave me fluency in the data systems that underpin risk reporting.

My MSc in Investment & Risk Finance provided rigorous grounding in risk frameworks, quantitative analysis, and regulatory considerations, which I am eager to apply in a dedicated risk reporting capacity. Having briefly stepped into an advertising role, I am now firmly committed to returning to financial services where my expertise and passion lie. I am a detail-oriented professional who thrives on translating complex operational data into clear, actionable insights for stakeholders.

I would welcome the opportunity to discuss how my experience aligns with your team's needs. I do require Skilled Worker visa sponsorship and am happy to provide further details. Thank you for your consideration-I look forward to hearing from you.
