I am writing to express my strong interest in the Operational / Enterprise Risk fixed-term contract position. With 2.5 years of experience at Morgan Stanley's Prime Brokerage division and a Master's degree in Investment & Risk Finance (Distinction), I bring a solid foundation in identifying, managing, and mitigating operational risk within complex financial environments.

At Morgan Stanley in Glasgow, I worked extensively across trade settlement, reconciliation, post-trade operations, and corporate actions-functions where operational risk management is embedded in daily practice. I developed a keen understanding of how process failures, control gaps, and system breakdowns translate into enterprise-level risk, and I consistently contributed to improving workflows and reducing settlement exceptions. My advanced proficiency in Excel/VBA, Bloomberg, CTM, and Refinitiv Eikon enables me to analyse large datasets, flag anomalies, and support risk reporting with precision.

My MSc in Investment & Risk Finance provided rigorous academic grounding in risk frameworks, quantitative modelling, and regulatory standards, complementing my practical experience. Although I have been working in advertising account management during a brief career transition, this period has sharpened my stakeholder management, project coordination, and communication skills-all directly transferable to an enterprise risk function. I am now firmly committed to returning to financial services, where my expertise and passion lie.

I would welcome the opportunity to contribute to your risk team and am available to start promptly for this 12-month contract. I do require Skilled Worker visa sponsorship and am happy to discuss this further. Thank you for considering my application-I look forward to the opportunity to speak with you.
