I am writing to express my strong interest in the Operations Analyst - Macro/Credit role. With 2.5 years of post-trade operations experience at Morgan Stanley's Prime Brokerage division and a Master's degree in Investment & Risk Finance (Distinction), I bring a solid foundation in trade lifecycle management directly applicable to macro and credit operations.

At Morgan Stanley in Glasgow, I managed trade settlement and reconciliation across multiple asset classes, processed corporate actions, and resolved breaks across counterparties-developing the analytical rigour and attention to detail that credit and macro operations demand. I worked daily with Bloomberg, CTM, and Refinitiv Eikon, and built advanced Excel/VBA tools to streamline reconciliation workflows and improve reporting accuracy. This experience gave me a thorough understanding of how front-office strategies translate into operational processes, particularly the complexities of fixed income and derivatives settlement.

I am currently working as an Advertising Account Manager, a role that has sharpened my stakeholder management, project coordination, and ability to perform under tight deadlines. However, my passion remains firmly in financial markets operations, and I am eager to return to a role where I can apply my technical expertise and market knowledge to support trading desks effectively.

I would welcome the opportunity to discuss how my experience aligns with your team's needs. I do require Skilled Worker visa sponsorship and am happy to provide further details on this. Thank you for your consideration-I look forward to hearing from you.
