I am writing to express my strong interest in the Operations Control Manager, Personal Investing - Associate position at Fidelity International. With 2.5 years of post-trade operations experience at Morgan Stanley's Prime Brokerage division and a Master's degree in Investment & Risk Finance (Distinction), I am well-positioned to contribute to your team's operational excellence and control framework.

At Morgan Stanley in Glasgow, I developed deep expertise in trade settlement, daily reconciliation, and corporate actions processing across multiple asset classes. I built robust control processes to identify and resolve breaks, working closely with front office, middle office, and external counterparties to ensure seamless post-trade workflows. My advanced Excel/VBA skills enabled me to automate reconciliation reporting and exception management, reducing manual errors and improving turnaround times. I also gained proficiency with Bloomberg, CTM, and Refinitiv Eikon, giving me a strong technical foundation for managing operational risk in a fast-paced investment environment.

This role's focus on operational controls, process improvement, and risk mitigation within Personal Investing aligns directly with my experience and career ambitions. Having briefly explored a different industry, I am now firmly committed to returning to financial operations, where my analytical rigour and passion for process integrity can deliver the most impact. I am particularly drawn to Fidelity's client-centric approach and reputation for operational excellence.

I would welcome the opportunity to discuss how my background can support your team's objectives. I do require Skilled Worker visa sponsorship and am happy to provide further details. I look forward to hearing from you.
